# CDMO

As a leading Contract Development and Manufacturing Organization (CDMO) we continuously improve our solutions to the rehabilitation and aged care industries.

With our decades of experience, own tool shop, and extensive production set-up, we have the competences needed to successfully complete your projects.

# Customized solutions

Unique solutions are often required to make the perfect wheelchair – fitted with components that meet your standards and design as a producer.

We have developed customized solutions in close collaboration with our partners for decades, and today, a large part of our production consists of those unique products.

Based on MBL or Omobic standard products, we create unique components that fit customer-specific requirements and needs. Whether it comes to a special design of a front castor, a wheelchair frame curved to perfection, side guards in carbon, seating systems, or just a push rim with tailormade dimensions.
