BIGGER, STRONGER, THICKER, BETTER WHOLE BODY CLEANING WIPES FRESHEN UP WHEREVER YOU ARE

Glycerol

CODE	SIZE	MATERIALS	PACKAGE
991851	8" x 12" (20cm x 30cm)	40% viscose 60% polyester	50pcs x 8bags/case

NuMedical® Adult Wet Wipes are ultra-soft, premium spunlace cleansing cloths that come in soft, easy-to-carry packs. These packs feature resealable lids designed to maintain moisture within, ensuring that each wipe remains fresh and moist for effective cleansing. The wipes themselves are pre-moistened with a hypoallergenic, alcohol-free solution infused with lanolin and aloe. This unique formula is crafted to soften the skin without necessitating a subsequent rinse or the use of towels, and it also actively works to prevent skin dryness. Measuring a generous 9 inches by 13 inches, the premium spunlace material used for these wipes is notably softer on the skin compared to other wipe materials. It is less bulky and possesses a more cloth-like texture, which allows for a more thorough cleansing action, especially within skin folds. Moreover, the durability of the material significantly reduces the chance of tearing during use.

Ingredients: purified water, aloe vera, quaternary ammonium salt, glycerol.

1. Soft yet durable spunlace material feels softer on skin with less chance of tearing.
2. Lanolin and aloe soften the skin.
3. No-rinse formula eliminates need for rinse and towels.
4. Alcohol-free formula prevents drying of skin.
5. Resealable lids preserve moisture.

Antibac Unscented

998257

Antibac Scented

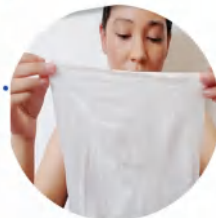

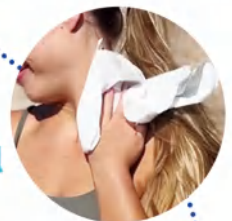

Moistened antibac/decontamination wipe, Onyx with 2% chlorhexidine digluconate (CHG), for decontamination, integral body washing & skin care. pH-skin neutral. Formulation with nourishing ingredients like glycerine, aloe vera and vitamin E plus CHG for effective germicidal cleaning. The CHG lotion, which does not need to be rinsed off, kills harmful bacteria on the skin and eliminates a large number of micro-organisms that can cause infections. The active ingredient remains on the skin and ensures long-term decolonisation. Well tolerated by patients and is a true life-saver in terms of prevention of infection and multi-drug resistant organisms.

Flip top dispenser ✓

✓ Extra large

✓ Effective germicidal cleaning

FOR ALL BODY USE

NuMedical®

WASHING WITHOUT WATER

The Problem:

Many people need help with their daily personal grooming. Traditionally, caregivers have utilized a wash basin, soap and towels to bathe bed-ridden patients. This method demands a considerable amount of time, effort and causes a stress for both the caregiver and the patient.

Water and soap can dry out the skin and cause irritation. In many cases, water plays an important role in transferring pathogens from one patient to another. In addition, washbasins are used several times a day, often by different care recipients, which increases the risk of cross-contamination.

The solution:

NuMedical® waterless bathing is developed for a complete body wash. It has been designed to promote healthy skin and eliminate the risk of cross-contamination. It is ideal for bathing people with reduced mobility.

The lotions contained in the NuMedical® products has a neutral acidity (pH), helps to keep your skin healthy, is dermatologically tested and contains no soap, latex, dyes, parabens or alcohol. The lotion is self-drying and thus eliminates the need for rinsing and drying.

Every part of the body is washed with a clean wash mitten, and the NuMedical® products contain nourishing ingredients for the skin.

The ready-to-use packs can be heated in the microwave or with the NuMedical® smart warmer, which enhances comfort and contributes to a better overall body wash experience. The products are also suitable for refrigeration.

ed use. This method has been demonstrated to be much more hygienic than conventional washing with water and soap. It is better for the skin and significantly more comfortable for both the patient and the caregiver.

Furthermore, it saves valuable time and material costs (such as washbasins, soap, washcloths, towels, lotion, cleaning costs, and the cost of water consumption).

How does it work?

The lotion-soaked wash mittens are ready to use at ambient temperature or can be warmed up to feel pleasantly warm. The patient is then washed according to the washing schedule. The washcloths can be used on both sides. Rinsing is not necessary, and the lotion will dry on its own. After washing, the washcloths can be disposed of in the trash. With NuMedical®, you combine four steps into one action: washing, rinsing, drying, and skin care.

Why choose NuMedical® ?

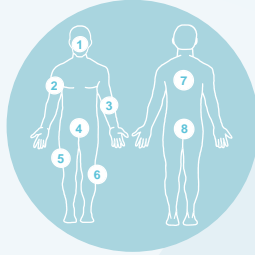

Proven & innovative brand since 2010. Hospital and care home references throughout Europe.

Production under stringent standards: ISO 9001, ISO 22716 (GMP), and ISO 13485.

A broad, comprehensive, and color-coded product line. Mittens are fluffy, soft, lint-free, and strong; made of special knobbed Innojet® nonwoven.

Mild preservative-blended lotions with optimized combinations of active substances offer broad-spectrum efficacy, keeping the products free of microbial growth. The lotions include versatile, multifunctional skin care additives. Dermatologically tested with ingredients compliant with European REACH regulation.

Offering a unique intelligent smart warmer for controlled, safe, and economic warming of the mittens and hair cleaning caps.

MOISTENED BODY WASH GLOVES What are the choices?

Moistened Wash Mittens for Daily Personal Grooming

Dermatologically confirmed, pH skin-neutral with nourishing ingredients such as glycerin, aloe vera, and vitamin E. Self-drying (rinsing and drying are not necessary). Available in freshly scented or fragrance-free options.

Antibacterial Moistened Wash Mittens

Moistened Antibacterial/Decontamination Mittens Type: Onyx with 2% Chlorhexidine Digluconate (CHG) for Decontamination, Integral Body Washing, and Skin Care. Dermatologically confirmed; pH skin-neutral. Formulation includes nourishing ingredients like glycerin, aloe vera, and vitamin E, plus CHG for an effective germicidal effect in accordance with EN 13727 & EN 1276 (including bacterial such as MRSA/VRE multi-resistant pathogens), EN 13624 (yeast killer), EN 1650 (fungicide), and EN 14476 (virucidal including SARS-CoV-2). Heatable in the microwave or with the special Innocare® warmer.

The CHG lotion, which does not need to be rinsed off, kills harmful bacteria on the skin and eliminates a large number of microorganisms that can cause infections. The active ingredient remains on the skin, ensuring long-term decolonization. It is well tolerated by patients and truly saves lives in terms of preventing infections and multi-drug-resistant organisms.

MOISTENED HAIR CLEANING CAP What are the choices?

Antibacterial Hair Cleaning Caps

Onyx Decontamin antibacterial hair washing lotion offers a quick and easy way to hygienically wash your hair and clean your scalp without using water or shampoo. The lotion contains 2% chlorhexidine digluconate (CHG), is dermatologically confirmed, and has a pH balanced for the skin. It is formulated with nourishing ingredients such as glycerin, aloe vera, and vitamin E, along with CHG for an effective germicidal effect in accordance with EN 13727 & EN 1276 (including bacterial such as MRSA/VRE multi-resistant pathogens), EN 13624 (yeast killer), EN 1650 (fungicide), and EN 14476 (virucide including SARS-CoV-2). These caps can be heated in the microwave or smart warmer for more comfort. They are suitable for external use in human hygiene and decolonization and are well tolerated by patients, making them a true lifesaver in terms of preventing infections and multi-drug resistant organisms.

The CHG lotion is self-drying and does not need to be rinsed out. It reduces harmful bacteria in the hair and scalp and eliminates a large number of microorganisms that can cause infections. The active ingredient ensures long-lasting decolonization.

To use, simply place the cap on your head and massage for 2 to 3 minutes. Then remove the cap and towel dry your hair. Comb and style your hair as usual.
